

# ThinkBook 14 IML

The design and convenience young professionals crave, at a price your organization can afford. This laptop is one of the thinnest and lightest available at this price range, and is packed with innovations; the optional fingerprint power button authenticates the user and wakes the device at the same time. Lenovo Hidden Port enables mouse dongles or nano-USB storage drives to be hidden behind a discrete 'door' in the side of the device.

It may have the design aesthetic of the latest consumer electronics with its ultra-narrow frame and anodized aluminum cover, but it's built for business with the same warranty and support services as a ThinkPad. That means your mobile users can access to extended warranties, faster technical support and advanced deployment services.

Optional WiFi 6 technology; with compatible routers and access points this enables more devices to connect at the same time without reducing bandwidth. It also features a WPA3 security protocol that is harder to hack.

The power button has an optional integrated fingerprint reader, so users can power-on or wake the device, and securely authenticate themselves at the same time.
