

ThinkBook 15 IML

Today's young, and increasingly mobile, workforce demand more from a work device. This laptop is one of the thinnest and lightest available at this price range, and is packed with innovations; the optional fingerprint power button authenticates the user and wakes the device at the same time. Lenovo Hidden Port enables mouse dongles or nano-USB storage drives to be hidden behind a discrete 'door' in the side of the device.

It may have the design aesthetic of the latest consumer electronics with its ultra-narrow frame and anodized aluminum cover, but it's built for business with the same warranty and support services as a ThinkPad. That means your mobile users can access to extended warranties, faster technical support and advanced deployment services.

Optional WiFi 6 technology; with compatible routers and access points this enables more devices to connect at the same time without reducing bandwidth. It also features a WPA3 security protocol that is harder to hack.

10th Gen Intel Core processor, optional AMD Radeon graphics and high-speed SSD storage drive, all combine to elevate the productivity of your mobile users.

Built for business with cutting-edge technology

ThinkBook combines the style and user experience of consumer devices with the security and business-class support of ThinkPad.

Lenovo services

Lenovo delivers tailored sustainability services, devices, and infrastructure solutions from our broad portfolio, working closely with you to support your target outcomes across the IT lifecycle..
