

Rugged compact performance primed for business

Lenovo V Series desktops offer exceptional value for money, and are available in a range of sizes and performance configurations to meet the varying needs of your workforce.

Lenovo V530-15ICR

This desktop is a great choice for refreshing old devices or supporting the needs of an expanding workforce. Behind the modern, professional design, is a desktop built for today's business environment of office productivity and cloud-based apps. Everything works faster and easier with the latest processor and storage technologies, a self-help software tool, and plenty of USB ports for connecting office peripherals and charging mobile devices.

M.2 PCIe SSD is the fastest storage technology available today, and it’s an option on this desktop. Alternatively, for lower performance and reduced cost, select HDD storage and Intel Optane™ memory, which boosts performance of the most frequently used files.

Educate your users about Lenovo Vantage; our app for users to self-service minor issues before asking for technical support. Run device diagnostics, update drivers, remove unnecessary files, and more.

Perfect for buyers looking to maximize the number of devices for their budget without compromising on the productivity needs of their users.
